Surabaya, Jawa Timur

I am a 4th semester Informatics student who has skills in data analysis, web developer, and data processing. Have a great interest in developing a career in the field of Data Analysis, Data Scientist, and Project Management and looking for internship opportunities as a Data Analyst. I'm known for being creative, well-organized, and a problem-solver with strong communication and teamwork skills.

Education

Universitas Pembangunan Nasional "Veteran" Jawa Timur - Surabaya

Aug 2023 -

Bachelor of informatic's Universitas Pembangunan Nasional "Veteran" Jawa Timur

- GPA 3.78/4.00 (4th semester)
- Relevant Subjects: Machine Learning, Fullstack Web Developer, Database Systems, Data Analysis, Data Scientist, Soft Computing

SMAN 2 BANGKALAN - Bangkalan

Jul 2020 - Feb 2023

Senior High School

- Average value 88,6/100
- Active in the management of the intra-school student organization (OSIS) as secretary

Organizational and Committee Experience

Organisasi Siswa Intra Sekolah (OSIS) - SMAN 2 BANGKALAN

Nov 2021 - Oct 2022

Secretary

- Responsible for Archival Affairs (Letters / Reports) Student Council
- Making a Proposal for Student Council Activity Design
- Make an Accountability Report (LPJ). Contains reports on the implementation of activities, evaluations, and reports on the use of funds.
- Being the contact person for every event that will be organized

Maba Cup X Connetion Days - Fakultas Ilmu Komputer

Jan 2024 - Feb 2024

Head of public relations division

- Responsible for coordination to members
- Send and be responsible for necessary correspondence
- Communicate with media partner and parties for venue rental
- Being the contact person for the chief executive together with secretary

Abdi Desa Informatika 2024 - Mojokerto, Jawa Timur

Jul 2024

Head of public relations division

- Responsible for the delivery of documents to the village
- Being the contact person between the chief executive and the youth organization
- Responsible for and coordinating members

Skill Progression and Resource Knowledge 2024 - Ballroom Fakultas Hukum

Sep 2024

Member of the public relations division

- Seek media partners and sponsors
- Contacting sponsors and media partners
- Being Liaison Officer (LO)

Pekan Mahasiswa Baru Informatika 2024 - Giri Loka UPN "VETERAN" JAWA TIMUR

Aug 2024

Master Of Ceremony (MC)

- Guiding the event
- Research and Script Writing

Projects

Intelligent Netflix Movie Recommendation System using Fuzzy Logic algorithm

May 2024 - Jun 2024

Artificial intelligence course project

- Apply Fuzzy rules to effectively process and analyze subjective user preferences (such as genre, rating, and title)
- Design a system capable of handling input data uncertainty to improve the relevance of recommended movies to users
- Manage and process movie data sets as the basis for testing and validating the accuracy of the Fuzzy Logic algorithm
- Integrate the system with GUI (Graphics User Interface) to ease the user experience

Virtual Pet Management Using C++

Jun 2024

Final project of object oriented programming course

- Designing a management system by adding CRUD (Create, Read, Update, Delete) features
- Created 12 database classes to support the system
- System configuration to the database and to other libraries using C make
- Integration of the system with a GUI (Graphic User Interface), namely "FLTK" to make it easier for users to use the system.

Application of Fuzzy Logic in BrainTumor Classification System Based on MRI Image

May 2024 - Jun 2024

Prediction using visual image

- Design and implement a brain tumor classification system from MRI images, including pre-processing, segmentation, feature extraction, and Fuzzy Logic-based classification
- Fully responsible for the project workflow, from collection and pre-processing of MRI image datasets to implementation and testing of classification algorithms

TrihitaVegan Website

Mar 2024 - Apr 2024

Website programming projects

- Designing a website for a restaurant in Bali
- Create Login, Sign-in, Sign-out, and Feedback Features
- Tidying up website navigation

Implementation of Deep Learning-Machine Learning Method (CNN-RF) for Automatic Waste Sorting System

Apr 2024 - May 2024

Machine Learning Projects

- Developed an automated waste sorting system using a hybrid method of CNN (Convolutional Neural Network) and Random Forest (RF) for image-based classification
- Apply a transfer learning approach to CNN models to speed up the training process and utilize features that have been learned from large datasets
- Optimizing the model architecture to achieve a balance between computational speed and classification accuracy.

Skills

- **Hard Skills:** Data Science, Data analysis, Data Visualization, Spreadsheets, Back end, Programming Languages (Python, SQL, C++, JavaScript, Typescript, PHP, HTML, CSS), MS. Office (Ms. Word, Ms. Excel, Ms. Powerpoint)
- **Soft Skills:** Problem Solving, Public Speaking, Critical Thinking, Teamwork, Adaptability, Responsible, Time management, Team Leadership
- **Software:** Visual Studio Code, Visual Studio 2022 IDE, Figma, Power Designer, GNS 3, VMWARE, My SQL, XAMPP, Google Colab, Git
- **Languages:** Bahasa (Native), English (Intermediate)
